Symposium Objectives, which ones apply to paediatric, geriatric and rare disease populations

- To approach the development of drugs from demographic and economic perspective,
- To learn how maturational changes in extreme ages explain the pharmacological challenges,
- To understand how clinical trials are conducted,
- To become acquainted with the current and near future regulatory framework surrounding clinical trials and marketing authorisation procedures,
- To understand how developing drugs in such indications is also a driver for innovation,
- To raise awareness about the challenges in the medical journey of patients suffering from a rare disease and how they organize themselves to become active in their disease management,
- Besides, to learn how transformation and change management are becoming essential to meet the challenges of a highly dynamic and complex environment.

Target Audience

Professionals involved in any phase of the Medicines Development Process, e.g. in Clinical and Non-Clinical Development, Regulatory Affairs, Pharmacovigilance, Medical Affairs, working in the Pharmaceutical Industry, Contract Research Organisations, Academia, Medicines Agencies, Ethics Committees or Patient Organisations.
