HIRSLANDEN
SWISS HOSPITAL GROUP

AIM: COSTS OF MEDICATION ERRORS?
DEFINITIONS, ESTIMATIONS, EXTRAPOLATIONS

HIRSLANDEN
SWISS HOSPITAL GROUP

No standard methodology for reporting of costs of medication errors

- Definition / incidence of medication error and associated costs vary greatly
- Different perspectives: hospital, insurance, government
- Differences in healthcare systems across the world
- Dependence on statistical models & assumptions

$ 2'400.-

$ 8'500.-

€ 1'500.- to 4'100.-

$ 4'600.-

Study Aim: How much do medication errors cost us?

→ Identify cases of "relevant" medication errors
→ Match them with suitable controls
→ Compare costs transparently

METHODS: MEDICATION ERRORS
IDENTIFICATION OF CASES

HIRSLANDEN
SWISS HOSPITAL GROUP

7 hospitals, 3 years (2021 - 2023), approx. 200’000 patients: 21 cases of medication errors

- Critical Incident Reporting System / pharmacovigilance cases
- Drug data (antidotes, drug-drug interactions, overdosing, etc.)
- Lab data (renal impairment, therapeutic drug monitoring, etc.)

Case 6

Case 8

Case 18

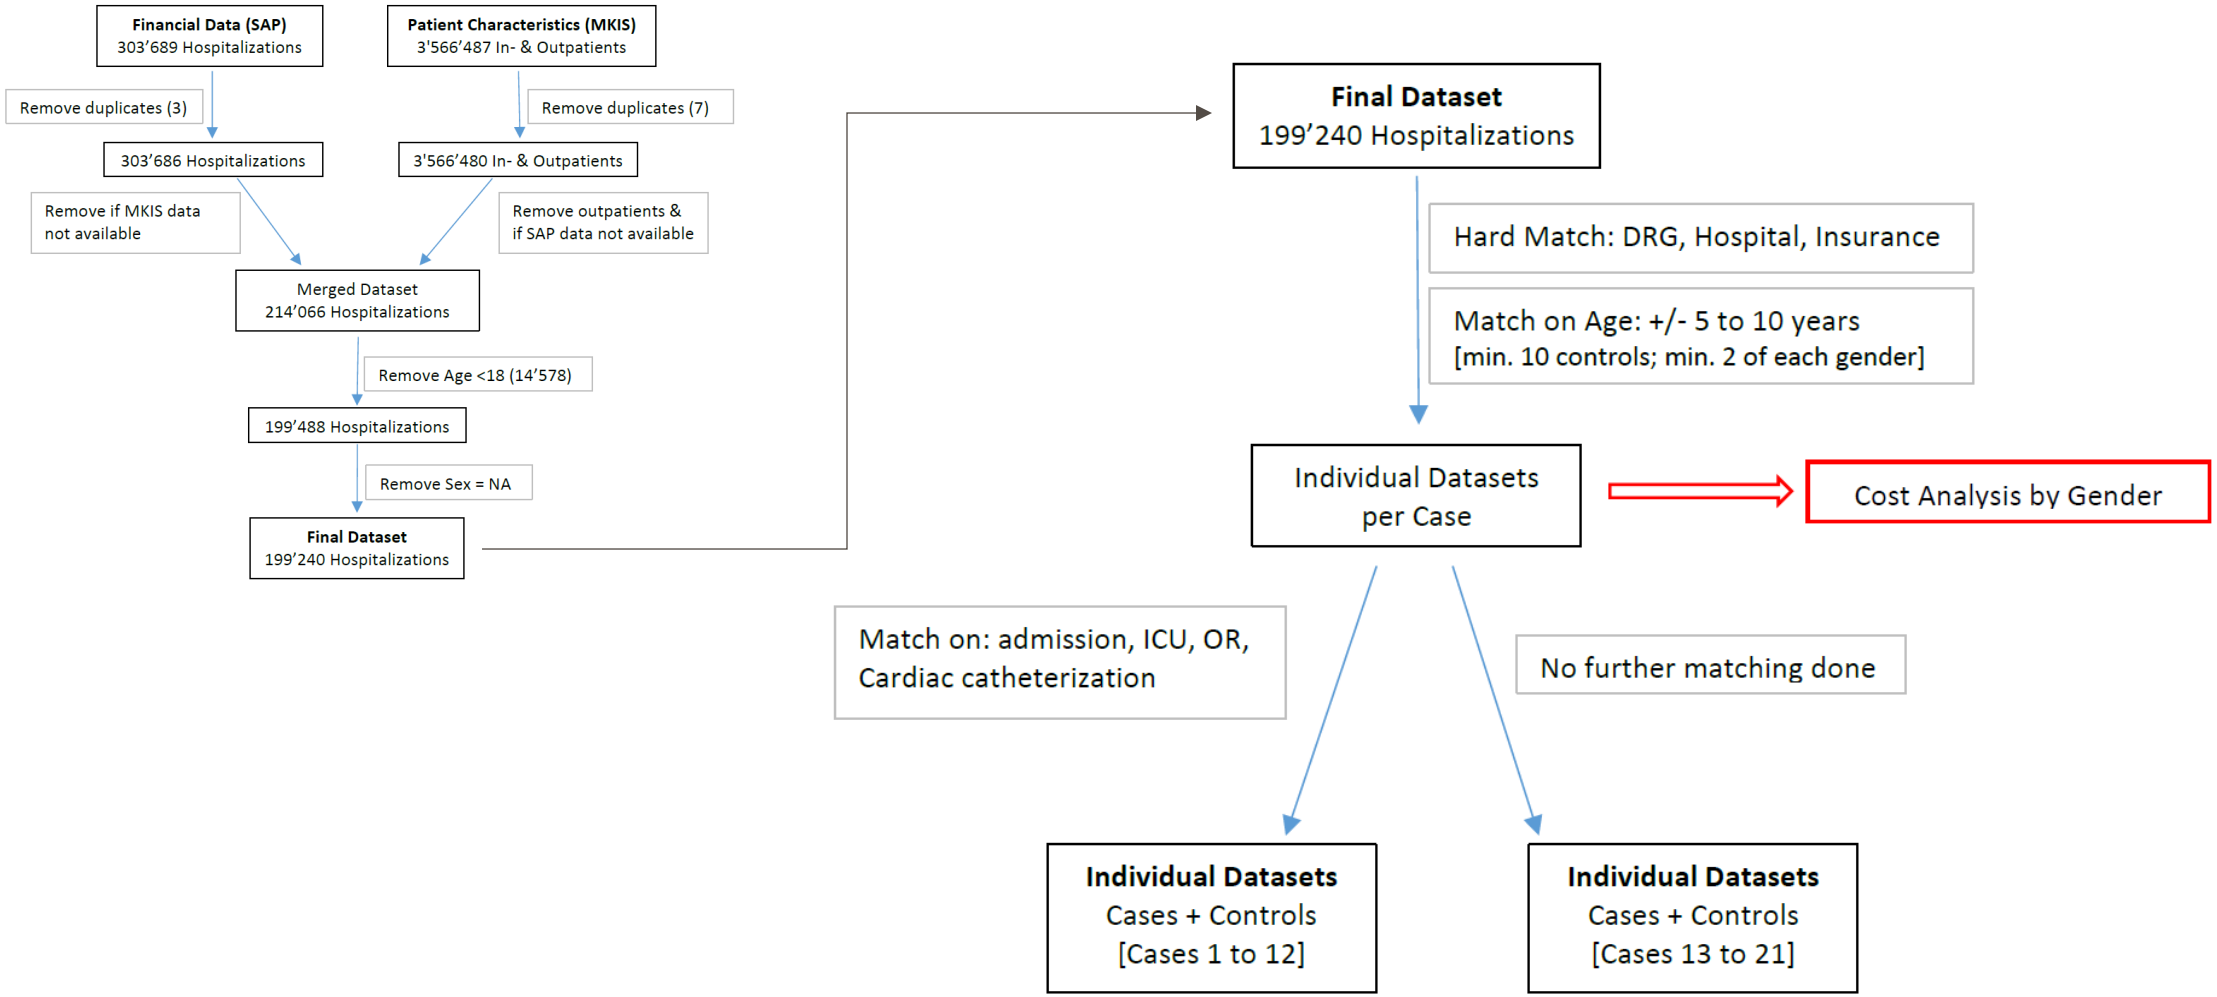
Case 21

→ Associated with **serious / severe outcomes** according to HAMEC*

* Harm Associated with Medication Error Classification, Gates P, Standardising the classification of harm associated with medication errors HAMEC, Drug Saf 2019

METHODS: MATCHING CASES...

HIRSLANDEN
SWISS HOSPITAL GROUP



METHODS: MATCHING CASES… … TO CONTROLS

HIRSLANDEN
SWISS HOSPITAL GROUP

ERROR	# CONTROLS	MATCHING CRITERIA
1	35	DRG, Hospital, Insurance, Age (+/-5), Admission Type, IPS*, OPS*, Heart catheter lab*
2	6	
3	12	
4	77	
5	152	
6	14	
7	48	
8	13	
9	21	
10	118	
11	2	
12	117	
13	6	DRG, Hospital, Insurance, Age (+/-10)
14	4	
15	3	
16	3	
17	3	
18	3	
19	2	
20	2	
21	2	

Easy DRG, plenty controls, closely matched, not expensive, expected Ø length of stay: 4.8 days[8]

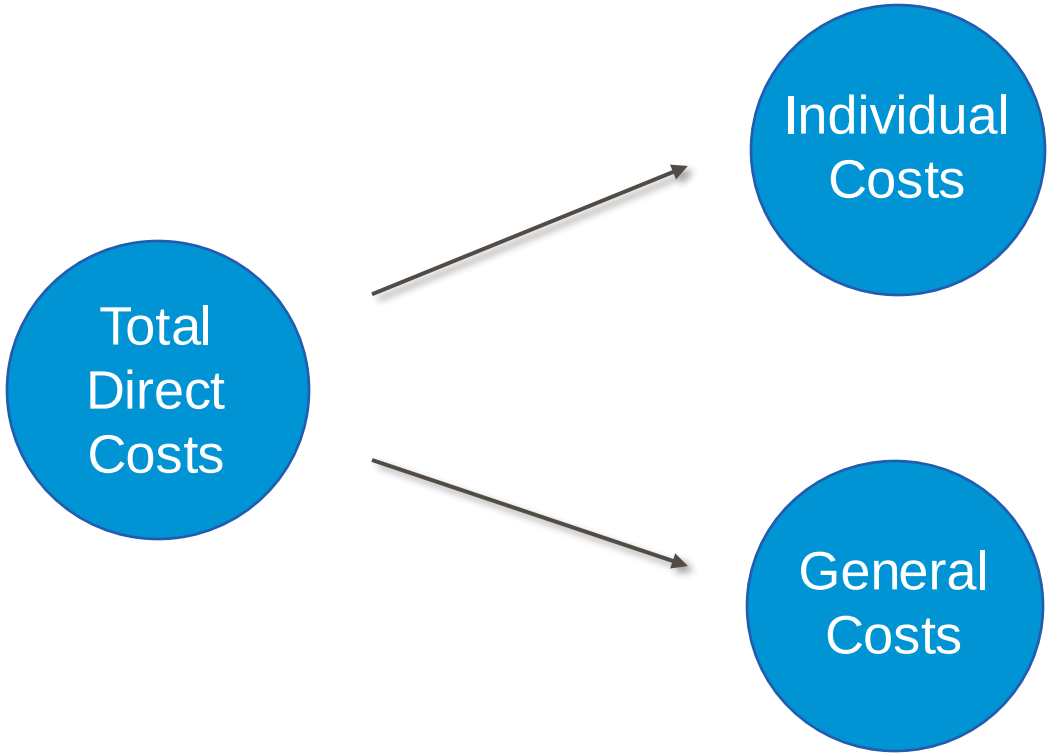
Challenging DRG, few controls, basics matched, expensive, expected length Ø of stay: 22.3 days[8]

* Exclusion of cases without IPS / OPS / HCL

[8] https://www.swissdrg.org/application/files/6017/0005/6194/230928_SwissDRG_Broschuere_e.pdf (accessed 2024-05-28)

METHODS: HOSPITAL ACCOUNTING*...
... AN INTRODUCTION

HIRSLANDEN
SWISS HOSPITAL GROUP



Available for each patient individually
- Drugs, blood products
- Implants, medical material
- External lab / diagnostics

Annual costs for service → time-based allocation
- Room costs / hospitality service
- Physicians, nurses, therapists
- Minutes spent on ICU

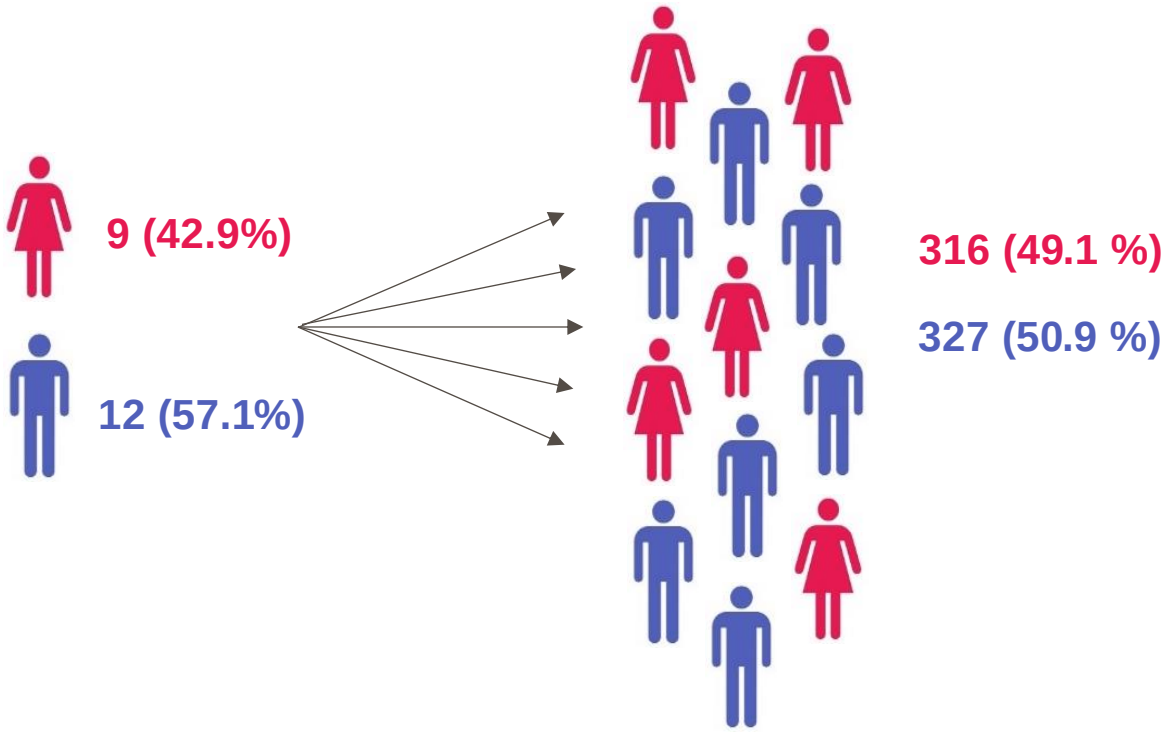
* Accounting according to REKOLE (Revision der Kostenrechnung und Leistungserfassung)

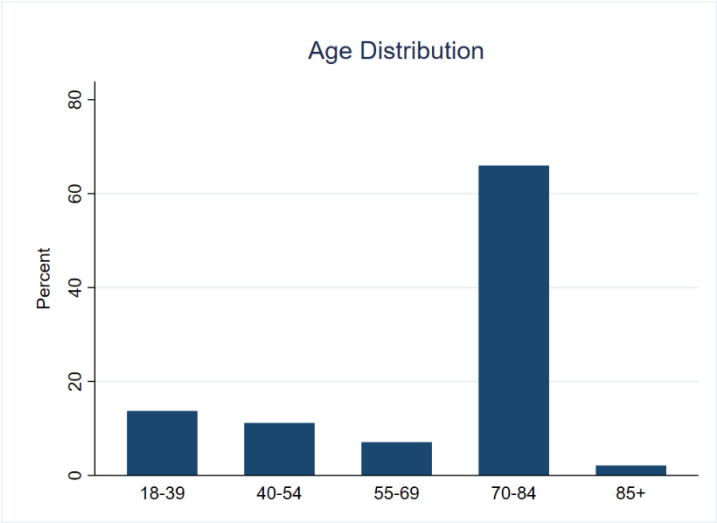
RESULTS
PATIENT CHARACTERISTICS

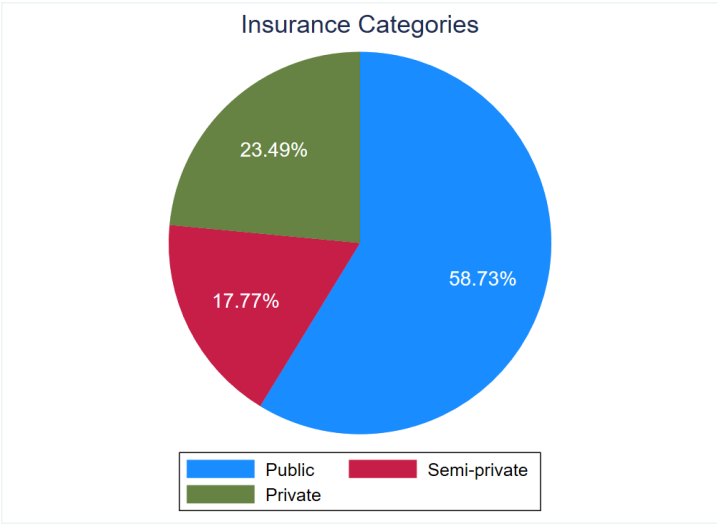
HIRSLANDEN
SWISS HOSPITAL GROUP

21 Cases

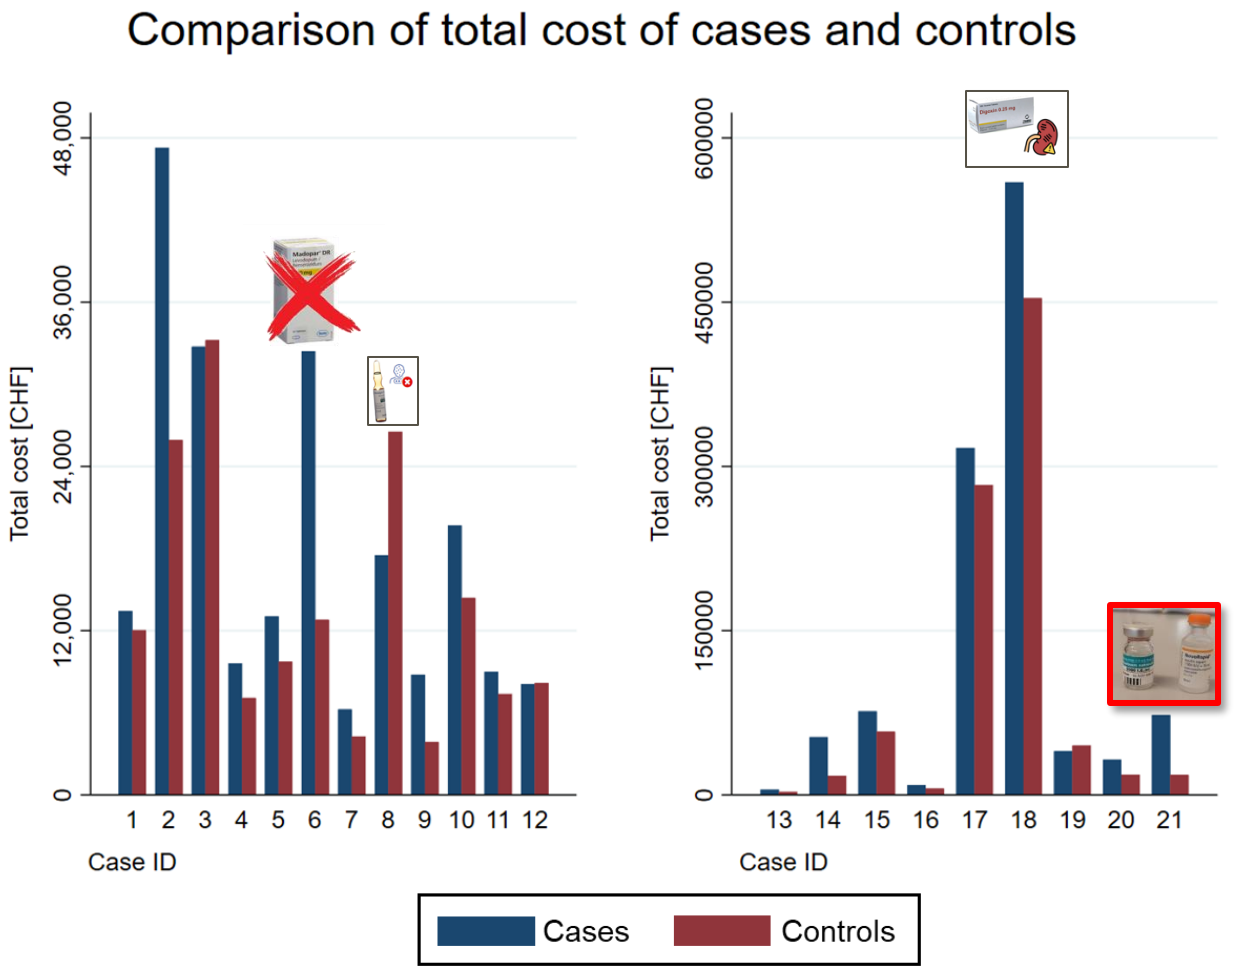
643 Controls







RESULTS
TOTAL COSTS



Ø Cases 1-12: CHF +4’400.- (32%)

Ø Cases 13-21: CHF +30’100.- (29%)

Ø Total: CHF +15’000 (30%)

Ø Length of stay for cases: +4.3 days

DISCUSSION
LIMITATIONS

HIRSLANDEN
SWISS HOSPITAL GROUP

- Overlooking / underreporting of medication errors, what about medium & low harm cases? 🤔

- Association of medication errors with outcome ≠ causality → multifactorial confounding… 😅

- Number of controls varies from 2 to 152 → “real life” limitations 🤦

CONCLUSION / TAKE HOME MESSAGE

HIRSLANDEN
SWISS HOSPITAL GROUP

- Identified 21 relevant medication errors in 7 Swiss hospitals 🏥
- Matched them with best possible controls to reduce confounding 🤓
- Average additional lengths of stay associated with medication errors: +4 days 😕
- Costs associated with studied medication errors: +30 % of total costs, mean +CHF 15’000.- 

Not spending enough to prevent medication errors is expensive!
