

Join us for our Moderna forum at the GSASA congress 2022 in Luzern

**Wednesday 9 November | 13:00 to 13:30**

Messe Luzern, Forum 3 or Online

## mRNA science addressing medical needs

Emilio Fumero, MD, Director Scientific Leadership Europe at Moderna will give an overview on mRNA technology and its applications, explain the concept of lipid nanoparticle delivery and the clinical manufacturing thereof. He will further delve into the speed and the agility of mRNA vaccines and set an example with the development of novel bivalent mRNA approaches for the prevention of COVID 19, paving the way for other multivalent investigational vaccines including influenza.
